PAYS AMERICA

Pay-As-You-Save Energy Efficiency Products Restructuring Energy Efficiency

Paul A. Cillo & Harlan Lachman, Energy Efficiency Institute December 1, 1999

A tariff assigned to a meter location, not to an individual customer.

Billing and payment on a utility bill with disconnection for non-payment.

Independent certification that products are appropriate and savings estimates exceed payments.

From 'pre-pay' to 'pay as you save'

Breakthroughs
for the twenty-first
century

PURPOSE OF THIS TASK GROUP

The Government's HESS consultation document proposes a form of financing for low carbon refurbishment in the household sector which it terms "Pay As You Save" (PAYS). Central to the concept is the idea of spreading the cost of refurbishment for a property over a substantial period of time, across different owners.
